

The Dreamweaver interface

Student name: _____ Date: _____

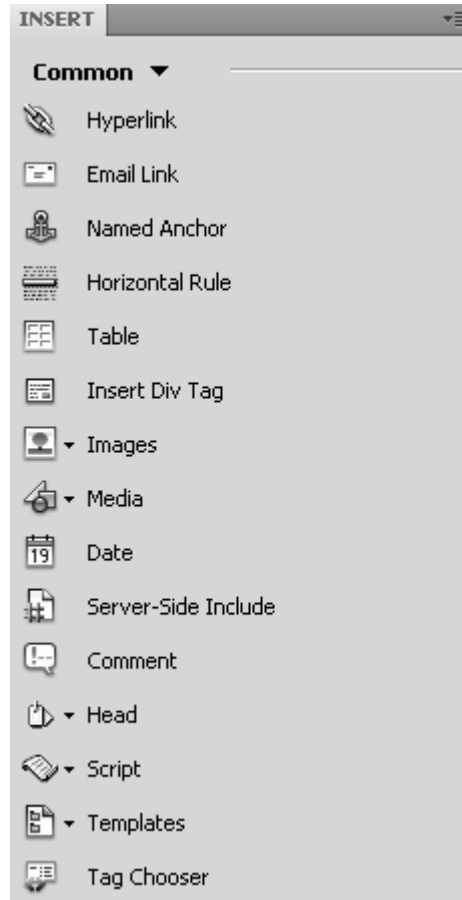

The most commonly used parts of the Adobe Dreamweaver CS4 interface are the Document window, the Insert bar, the panels, and the Property inspector. In the figure below, label the Document window, the Insert bar, the panels, and the Property inspector.

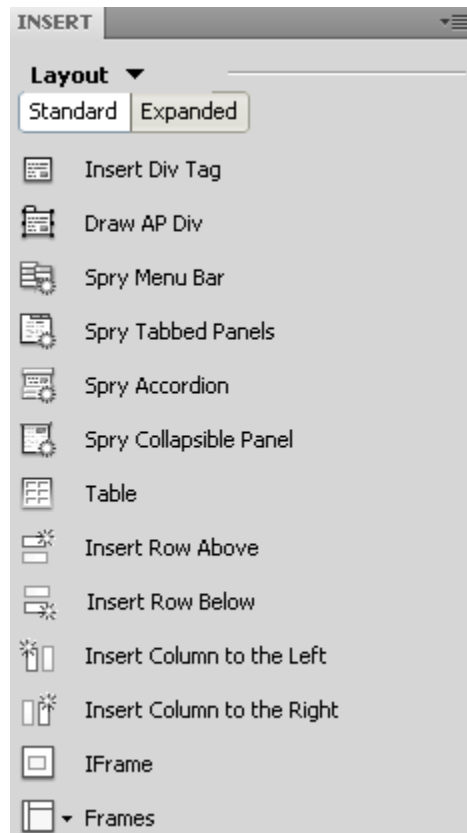

The *Insert bar* contains buttons for inserting various types of objects, such as images and tables, into a document (web page). The Insert bar contains several categories, such as Common and Layout.

The Common category contains buttons for inserting the most commonly used objects.

Identify and describe the function of the buttons on the *Common category* in the *Insert bar*.

Identify and describe the function of the buttons on the *Layout category* in the *Insert bar*.

The *Property inspector* enables you to view and change a variety of properties for the currently selected object or text.

Describe the Property inspector.
